

ePNMobile

Secure Cell Phone Transaction Processing

Are you Mobile?

eProcessingNetwork makes wireless transaction processing available at **swiped rates** through **Java®** and **Bluetooth™** enabled cell phones and PDAs. The **ePNMobile J2ME™ Credit Card Transaction** Processing Application can prompt for invoice number, gratuity, other charges, process the transaction in real-time, and show the transaction authorization number **right on the phone display**.

Bluetooth-Enabled MagStripe Reader / Printer
with a BlackBerry® 8800™

Merchant Benefits

- **Fraud Prevention:** Real-time credit card and check processing, get approval or decline response at time of sale.
- **Lower Cost:** Lower investment than dedicated wireless transaction processing units.
- **Swiped Rates:** Reduced rate with Card swipe transactions from credit card processors.
- **Real-Time Processing:** No chasing after customers for declined transactions.
- **Ease Of Use:** Less time consumption than voice authorization processing.
- **Reporting:** Online tracking and transaction reports.
- **Lower Overhead:** No personnel needed in the back room to do manual entry authorizations.
- **Multi-Function Device:** Phone, email, 2 way radio (walkie-talkie) and credit card/check terminal. The entire process is simple and convenient to use.

eProcessingNetwork offers reliable and secure credit card and check transaction processing services and professional support every step of the way.
